TITLE OF INVENTION: ELECTRONIC COMPONENT RELIABILITY DETERMINATION SYSTEM AND METHOD

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1440	\$0	\$0	\$1440	10/29/2008

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 1SI. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and I/2 the ISSUE FFE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or Fax (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where

appropriate. All further indicated unless correcte maintenance fee notifical	correspondence includir ed below or directed oth tions.	ng the Patent, advance on herwise in Block 1, by (a	rders and notification of n a) specifying a new corres	naintenance fees w pondence address;	ill be and/o	mailed to the current r (b) indicating a sepa	correspondence address as rate "FEE ADDRESS" for
CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)				Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 467 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 467 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

Response to Amendment

 This action is responsive to the Amendments filed March 19, 2008. Claims 2-25, 27-31 and 34-36 are pending. Claims 2-7, 10-15, 22 and 27 have been amended.
 Claims 1, 26, 32 and 33 have been cancelled.

EXAMINER'S AMENDMENT

- 2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 3. The application has been amended as follows:

IN THE CLAIMS:

Claim 17, line 6 currently states "means for the identifying a cumulative reliability" and has been replaced with --means for identifying a cumulative reliability-- (note " the" has been deleted).

Claim 35 has been deleted (note it was duplicate of claim 34).

Allowable Subject Matter

- Claims 2-25, 27-31 and 34-36 are allowed.
- 5. The following is an examiner's statement of reasons for allowance:

Art Unit: 2857

Garrow et al. (US PGPub 2002/0194160) teaches a method and system for managing configuration of mechanical equipment. MTBF information is provided by a manufacturer and updated by subsequent testing and monitoring of the performance of the assembly. Garrow teaches a data processing system including a configuration database and an output visible to engineers. Garrow does not teach determining the electrical stress adjustment factor by comparing the actual communication capacity utilization to an expected communication capacity utilization.

Schwaller et al. (US Patent 5,937,165) teaches traffic based communications network performance testing. Testing of the performance of a communications network includes a plurality of endpoint nodes under conditions reflecting operations for the actual application traffic which the network to be tested handles. A type of application communication traffic expected is first determined and then stress tests are completed. The test scenario represents actual operating conditions and reflects expected operating conditions. Schwaller does not teach determining the electrical stress adjustment factor by comparing the actual communication capacity utilization to an expected communication capacity utilization.

"Estimating Drive Reliability in Desktop Computers Consumer Electronics

Systems" by Seagate Technologies discusses a method for estimating drive reliability in desktop computers. Weibull parameters are estimated to represent a distribution of failures. The Weibull parameters are then used for estimating the MTBF. An adjustment curve is applied for circumstances where the usage rate is lower, and temperature is taken into account in calculations. The MTBF is multiplied by the

Art Unit: 2857

adjustment factors in order to produce an accurate estimation. Determining the electrical stress adjustment factor by comparing the actual communication capacity utilization to an expected communication capacity utilization is not taught by this publication.

Claims 2-13, 31 and 36 are allowable over the prior art because all combined limitations including an apparatus comprising a processor, a memory, instructions for a reference failure rate associated with a temperature, communicate with a monitored device, determine a temperature stress adjustment factor, determine an electrical stress adjustment factor, output the instantaneous failure rate and further determining the electrical stress adjustment factor by calculating a difference of the expected communication capacity utilization and the actual communication capacity utilization is not found, taught or suggested in the prior art of record.

Claims 14-21 are allowable over the prior art because all combined limitations including a system comprising inputting a MTBF based on expected environmental conditions and expected usage parameters for the device, measuring actual temperature, measuring actual communication capacity utilization of the device while the device is being operated in the field, determining a second MTBF which is adjusted according to a factor representing a difference between actual and expected temperature and a difference between actual electrical stress and expected electrical stress, outputting the second MTBF and further determining the electrical stress adjustment factor by comparing the actual communication capacity utilization to an

Art Unit: 2857

expected communication capacity utilization is not found, taught or suggested in the prior art of record.

Claims 22-25 are allowable over the prior art because all combined limitations including an initialization module directing a process of determining reliability by calculating a field-adjusted MTBF and a cumulative reliability index, output the calculated cumulative reliability index, and further determining the electrical stress adjustment factor by calculating a difference of the expected communication capacity utilization and the actual communication capacity utilization is not found, taught or suggested in the prior art of record.

Claims 27-30, 34 and 35 are allowable over the prior art because all combined limitations including identifying a reference failure rate for a device, measuring actual operating parameters, determining custom failure rate by adjusting the reference failure rate, outputting the custom failure rate, outputting the MTBF, and further determining the electrical stress adjustment factor by comparing the actual communication capacity utilization to an expected communication capacity utilization is not found, taught or suggested in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2857

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to JANET L. SUGLO whose telephone number is

(571)272-8584. The examiner can normally be reached on M-F from 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Eliseo Ramos-Feliciano can be reached on 571-272-7925. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
